*Effective Date March 21, 2025*

<b>Chemical</b>	
ASTM F2617	Standard test method for identification and quantification of chromium, bromine, cadmium, mercury, and lead in polymeric material using energy dispersive x-ray spectrometry
CPSC 16 CFR 1303	Ban of lead-containing paint and certain consumer products bearing lead-containing paint
CPSC-CH-E1001-8.3	Determining Total Lead (Pb) in Children's Metal Products (including children's metal jewelry)
CPSC-CH-E1002-8.3	Standard operating procedure for determining total lead (pb) in non-metal children's products (XRF portion only)
CPSC-CH-E1003-09.1	Determining lead (Pb) in paint and other similar surface coatings
CPSC-CH-E1004-11	Determining cadmium extractability from children's metal jewelry
CPSIA 2008, Section 101	Children's products containing lead; lead paint rule
EN 71-3:2013	Safety of toys - part 3: migration of certain elements (excluding chromium (III, IV) and organic tin)
<b>Physical</b>	
ABNT NBR 8023	Two-wheeled vehicle - bicycle - bicycle beam – dimensions
ABNT NBR 8024	Two-wheeled vehicle - bicycle - bicycle radius - determination of fatigue resistance
ABNT NBR 8691	Two wheels vehicle - bicycle - bicycle nipple - dimensions
ABNT NBR 8692	Two-wheeled vehicle - bicycle - radius and nipple - determination of tensile strength
ABNT NBR 9295	Two wheels vehicle - bicycle - brake cable - tensile strength test
ABNT NBR 13585	Tires safety - Rubber tires for bicycles
ABNT NBR 14713	Two-wheeled vehicle - bicycle - handlebar and handlebar support - safety requirements

Products Category	Certification Scheme and Scheme Owner / Standard
<b>Electrical</b>	<b>ACT Schemes</b>
<ul style="list-style-type: none"><li>Batteries for Use in Light Electric Vehicle Applications</li><li>Electrical Systems for Personal E-Mobility Devices</li><li>Electrical Systems for eBikes</li></ul>	ACT S1.1 – ACT Scheme Type 1b
<ul style="list-style-type: none"><li>Batteries for Use in Light Electric Vehicle Applications and Electrical Systems for Personal E-Mobility Devices</li></ul>	ACT S1.2 – ACT Certification Scheme Type 2
<ul style="list-style-type: none"><li>Batteries for Use in Light Electric Vehicle Applications and Electrical Systems for eBikes</li></ul>	ACT S1.3 – ACT Certification Scheme Type 3

**Notes:**

- The product certification used most closely resembles a product certification scheme type as described in ISO/IEC 17067 (2013), *Conformity assessment — Fundamentals of product certification and guidelines for product certification schemes*.
  - Type 1b:** This scheme type involves the certification of a whole batch of products, following selection and determination as specified in the scheme. The proportion to be tested, which can include testing of all the units in the batch (100% testing), would be based, for example, on the homogeneity of the items in the batch and the application of a sampling plan, where appropriate. If the outcome of the determination, review and decision is positive, all items in the batch may be described as certified and may have a mark of conformity affixed, if that is included in the scheme.
  - Type 2:** The surveillance part of this scheme involves periodically taking samples of the product from the market and subjecting them to determination activities to check that items produced subsequent to the initial attestation fulfil the specified requirements.

While this scheme may identify the impact of the distribution channel on conformity, the resources it requires can be extensive. Also, when significant nonconformities are found, effective corrective measures may be limited since the product has already been distributed to the market.
  - Type 3:** The surveillance part of this scheme involves periodically taking samples of the product from the point of production and subjecting them to determination activities to check that items produced subsequent to the initial attestation fulfil the specified requirements. The surveillance includes periodic assessment of the production process. This scheme does not provide any indication of the impact the distribution channel plays on conformity. When serious nonconformities are found, the opportunity may exist to resolve them before widespread market distribution occurs.

# UIAA APPROVED TEST LABORATORY

Climbing and mountaineering equipment tested to the UIAA's equipment standards is recommended by the UIAA for use by climbers and mountaineers.

ACT Lab LLC  
3280 E 59th St, Long Beach, CA 90805  
United States

The UIAA has the pleasure to accredit the above mentioned laboratory as a UIAA Certified Laboratory for the following equipment:

**UIAA 102 Accessory Cord**  
**UIAA 103 Tape**  
**UIAA 104 Slings**  
**UIAA 106 Helmets**  
**UIAA 109 Belay Lanyards**

**UIAA 121 Connectors**  
**UIAA 122 Pitons**  
**UIAA 126 Rope Clamps**  
**UIAA 152 Ice Tools**  
**UIAA 153 Crampons**

### Art.3.2 UIAA Approved Test Laboratory

A UIAA Accredited Test Laboratory is a laboratory where testing of equipment is done in accordance with the UIAA standards for mountaineering and climbing equipment or sub-contracts to a laboratory where such testing is done. All laboratories approved by the UIAA (...) are allowed to use the title "UIAA Approved". A maximum of two (2) representatives from each laboratory have a right to attend the UIAA Safety Commission Plenary meetings but without any voting rights. An approved laboratory shall re-apply for certification at the end of its three (3) year term.

**Peter Muir**  
UIAA President

**Lionel Kiener**  
UIAA Safety Commission President

\*This certificate is valid until 31st December of 2027.
